MADE TO ORDER

GUIDE

TIMELESS ELEGANCE, MODERN CRAFTSMANSHIP

Woodpecker Flooring is proud to offer a select range of custom made to order European oak flooring in chevron, for projects requiring for a unique and sophisticated look.

Solid European oak provides unparalleled authenticity and durability, perfect for those seeking a traditional hardwood feel with rich character and unique grain patterns. Engineered oak provides the warmth and beauty of traditional hardwood while offering enhanced durability and stability, making it ideal for various environments with the convenience of arriving pre-finished and ready to install. Each piece is meticulously crafted to create the iconic chevron pattern, adding a touch of artistry and character to your interiors.

This guide will walk you through the custom ordering process, helping you make informed decisions about materials, finishes, and design choices that perfectly fit your vision.

We'd love to discuss your specific project needs to please reach out to Tyler for further information on ordering your chevron flooring .

FAQs

Q: What is the difference between Chevron and Herringbone?

Chevron flooring features planks cut at an angle to create a continuous V-shaped pattern, while herringbone flooring consists of rectangular planks arranged in a zigzag design.

Q: What products are available in chevron?

Chevron flooring is available in select Engineered Oak AND Solid European Oak.

For pre-finished Engineered Oak, **all our Hampton Range, Signature Oak Range and Coswick Series colours can be custom made to order in chevron**, simply browse the colours online or visit our Osborne Park showroom to collect samples.

Solid oak arrives raw and unfinished, and is sanded and stained on site. We also have a raw engineered option that allows the same flexible finish on site, but with the benefits of engineered oak.

Q: Do you hold any chevron floors in stock locally?

No, all chevron flooring is custom made to order and requires approximately 12 to 16 weeks lead time but quantity and specific product selection can affect this so please get in touch for further details.

CONT'D

FAQs

Q: What dimensions are the chevron boards?

They can be created at any size, but the **standard dimensions** are:

Signature Oak Range – 120mm x 600mm x 15mm thick at 45 degrees

Hampton Range – 120mm x 600mm x 12mm thick at 45 degrees

Coswick Series – 127mm x 500mm x 15 or 19mm thick at 45 or 60 degrees

Solid European Oak– TBC

Other custom dimensions are available if needed, just talk to us.

Q: Is there a minimum order qty?

For products in the Hampton and Signature Oak Ranges the minimum order qty is 100m², for products from the Coswick Series there is no minimum.

Q: What is the installation method?

All chevron floors require **direct stick** installation. Note some installers will also charge a premium for chevron installation.

Q: Is there an extra cost involved?

Yes, as chevron is a custom order there is usually an additional fee on top of the standard flooring pricing depending on the product, grade etc. Talk to us about your specific requirements to get a proper cost estimate.
